

## Downloading Eutelsat Authorities Public Certificates

To download Eutelsat Authorities certificates, you need to visit the following website:

<http://pki.eutelsat.fr>

The following page will be displayed:

### EUTELSAT PKI WEB PAGE

Welcome to the Eutelsat PKI web page.

In order to secure digital exchanges, Eutelsat has set up a PKI - Public Key Infrastructure. The PKI is used to deliver the electronic certificates required for securing mails to internal users and external partners. The certificates are delivered for signing and encrypting digital messages (mails and sent files) between Eutelsat users and their partners.

**Warning:** As the carrier of a certificate, you are bound to follow the General Conditions of Use available below. In particular, these certificates may only be used for business exchanges with or related to Eutelsat.

On this page, you can download Eutelsat documents on certificate services and secure messaging. You may also obtain the Certificate Authorities certificates and the certificate revocation lists.

### DOCUMENTS

- [User Guide for Outlook 2003 \(french version \)](#)
- [General Conditions of Use for secure messaging \(french version\)](#)
- [Certification Policy of the Users Certification Authority \(french version\)](#)

### FILES

- [Certificate of the Users Certification Authority](#)
- [Certificate of Eutelsat Root Certification Authority](#)
- [Certificate revocation list for the Users Certification Authority](#)

You may download certificates using the links provided in the Files Section.

E.g.:

### FILES

- [Certificate of the Users Certification Authority](#)
- [Certificate of Eutelsat Root Certification Authority](#)
- [Certificate revocation list for the Users Certification Authority](#)
